April 29, 2024: One Day outreach activity for local schools organized by NSS Unit-I and II Durgapur Government College and Industrial Training Institute, Durgapur and Maruti Suzuki India Ltd

The primary objective of the one-day outreach activity was to provide an orientation to the Head of the Institution and all teachers of local schools regarding the MarutiSuzuki On Job Training Program. This program is a part of the skill development initiative of the Central Government, aimed at bridging the gap between industry requirements and academic curriculum. The event was attended by principals, teachers and students of different schools in and around Durgapur Government college. A total of 42 participants graced the event. Teachers from the ITI college, Durgapur and members of the Maruti Suzuki on job training program gave a vivid description of the course, the stipend structure, scope of growth in this career and the expected status of the student in the forthcoming years if they joined this program. The participants raised their doubts and all the doubts got cleared by the esteemed resource persons. Durgapur Government college and NSS Unit 1 and 2 therefore created this forum to spread awareness in the community about the concept of 'earn while you learn'. The event was a great success in that respect. Later on a Whatsapp group was formed keeping all the participants and the Principal of ITI College, Durgapur to facilitate ease of communication regarding any further related information which can benefit these students.

April 25, 2024: Awareness lecture and interactive session organized by Department of Zoology and NSS Units I and II to observe World Malaria Day

Two special lectures were organised to observe the World Malaria day on April 25, 2024. The first was on Malaria by Dr. Manas Paramanik, Assistant Professor of Animal Science, Kazi Nazrul University, and the second was on Mosquito: Public Enemy no 1 (WHO) by Dr. Kuntal Bhattacharya, Assistant Professor of Zoology Durgapur Government College. Both the lectures were informative and our volunteers learnt methods to have a clean community. These cleanliness measures would in turn reduce the breeding places of mosquitos, which in turn would cause the decrease in the cases of malaria in the community at large. Very simple practices of throwing unused stagnant water, like water in vases, tyres, pots, clogged drains can cause a great change to the mosquito population. Planting plants like Lavender, Citronella Grass (Lemon Grass) Catmint, Rosemary can easily keep away mosquitos. Another great mosquito repellent is rosemary, Scented Geranium. The NSS volunteers understood a lot about the root cause of Malaria and its preventive techniques and are well equipped to spread this awareness to the society at large.
